EDUCATION

University of Houston   May 2023

B.S. in Computer Science, Minor in Mathematics   GPA: 3.70

EXPERIENCE

FAST Enterprises   Jul 2023 - Present

Software Engineer   *Lansing, Michigan*

- Successfully completed numerous solution requests using C#, VB.NET, and SQL to address specific client needs and enhance the versatility of the product
- Designed and optimized SQL database queries and stored procedures to improve data retrieval and manipulation processes while facilitating accurate reporting and analysis
- Refactored and modernized legacy code to align the product with evolving industry standards
- Gathered client requirements and performed rigorous testing and debugging to maintain product stability

TensorIoT   Jan 2023 - May 2023

Software Engineer Intern   *Remote*

- Developed and enhanced an iOS application using JavaScript, React Native, HTML, CSS, and AWS Services to ensure scalability and high performance
- Conducted Test Driven Development when implementing key features and functionalities to ensure stability of the application while also contributing to UI/UX Design via Figma
- Used AWS CDK and AWS CloudFormation as Infrastructure as Code to simplify provisioning of infrastructure and the deployment process
- Actively participated in weekly stand-up meetings, providing updates on progress using Jira, contributing in code reviews, and discussing obstacles

EAG   Jan 2022 - Aug 2022

IT Analyst Intern   *Houston, Texas*

- Assisted with and resolved over 300 client tickets including password changes, email configuration updates, network issues, and various user requests
- Managed pending tickets by monitoring ticket queues and working with senior analysts to resolve them within defined service-level agreement
- Created automated email routine templates using HTML and CSS in ConnectWise PSA client

PROJECTS

La Habibi Restaurant   Dec 2022

- Worked in a team of 3 to make a restaurant application in which users can create an account, sign in, and create reservations for various party sizes using JavaScript, React, HTML, CSS, and SQLite

Pentagram Safety Solutions   Oct 2021

- Won 2nd place on a team of 4 at CodeRED hackathon for Google Cloud quest out of over 300 participants integrating Google Maps API into the application which provided user coordinates via geolocation using JavaScript, React, HTML, and CSS
